

Forgetting and Reconnecting to KEYOD – iPhone.

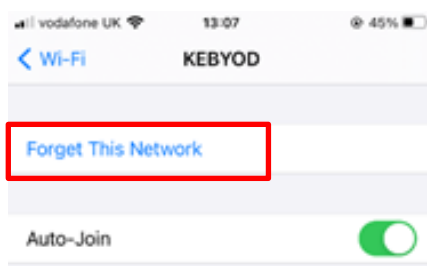

1. Go to **Settings** then tap on **Wi-Fi**, highlighted below in red.

2. Tap on the small information icon (i) to the right of **KEYOD**, highlighted below in red.

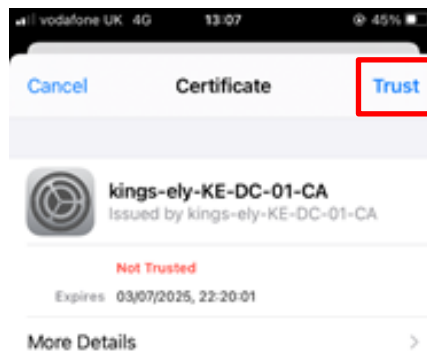

3. Then tap the **Forget This Network** button, highlighted below in red.

4. Under the Available Networks tap on **KEYOD**. It will prompt for a Username and Password. Please enter the details used to login to a school computer. Tap **Join** to continue, highlighted below in red.

5. Tap on **Trust** in the top right of your device to connect to **KEYBOD**, highlighted below in red.

Should you encounter any issues in this process please raise a support request via the ICT Support Ticket System. This can be done by clicking the RM Support application located on the desktop of any school device.
